

Ooma Connect Business Internet Service

Are you tired of being tied down by your traditional internet service provider? Say farewell to high bills, unpredictable reliability, lackluster customer support and hidden fees.

Whether you're a small office or growing enterprise, Ooma Connect is the perfect wireless internet solution for your connected business.

Tiered Plans

Overspending on internet capacity eats into your bottom line. With Ooma Connect, you can right-size your internet plan to meet actual business needs.

Reliable Network

Don't let internet outages hold your business back. Our wireless network infrastructure provides rock-solid reliability that keeps your business connected and productive.

Built-in Wi-Fi

Easily connect all devices from smart phones to computers to Point-of-Sales systems and more to dual-band Wi-Fi.

Transparent pricing

Enjoy straightforward monthly pricing plans with no surprises, overage fees or long-term commitments.

Easy Setup

Installation is as easy as connecting devices and activating service. And with built-in Wi-Fi there's no need for an additional wireless router. Perfect for mobile businesses like food trucks, construction sites and retail kiosks.

24x7 Customer Support

Say goodbye to long wait times and impersonal support. Our customer support team provides the personal assistance you deserve.

Join the thousands of businesses that are using Ooma Connect to unlock a new era of connectivity.

Ooma Connect 3000 Gateway Device

Phone Service

Ideal when paired with Ooma Office business phone service. Cut through the complexities of managing multiple invoices and customer support. With Ooma, you receive a single, consolidated invoice every month and a single point-of-contact for both internet and phone support.

Take the internet with you

Simply unplug the Ooma Connect 3000 gateway device and take it with you. Then, plug it into any power source to get instant wireless internet service just about anywhere. Ideal for opening new stores, branch offices, mobile businesses, check-out stands or field events.

Mobile app

See device connectivity status and signal strength, make configuration changes and more using your mobile phone.
